

### REMARKS

Claims 21-24 are currently active.

Applicant wishes to thank the Examiner for the detailed analysis identified in the Office Action.

The Examiner has rejected Claims 21-24 under 35 U.S.C. 101. Any reference to alphetoprotein protein receptor binding sites in the claims has been deleted. There is now identified only one antigen.

The Examiner has rejected Claims 21-24 under 35 U.S.C. 112. Claim 21 has been amended to delete the language "in relation to normal non-malignant individuals". It is believed that this amendment obviates this rejection.

In view of the foregoing amendments and remarks, it is respectfully requested that the outstanding rejections and objections to this application be reconsidered and withdrawn, and Claims 21-24, now in this application be allowed.

Respectfully submitted,

RICARDO J. MORO
